# Laser cut railings and gates

We design and produce laser-cut sheets for subsequent installation. We start from standard measurements and make railings and gates according to your needs, going through a primary consulting phase.

**L = 100 MM TO 2300 MM**

**H = 1230 MM / 1280 MM**

The above measurements are the standard measurements from which we start (length from 1000 mm to 2300 mm | Height 1230 mm or 1280 mm), it is possible to arrange to make other types of measurements according to various needs.

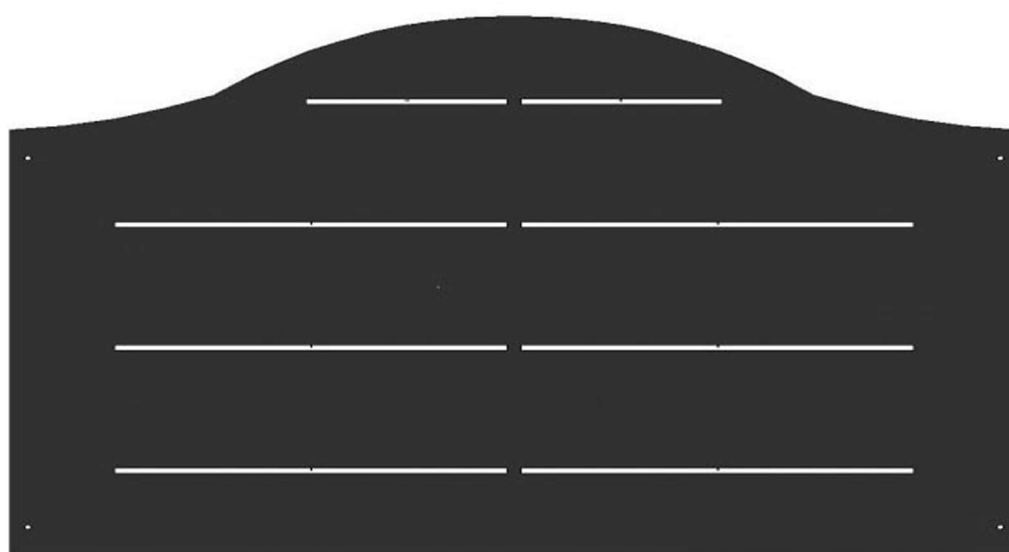

# Modular Fences

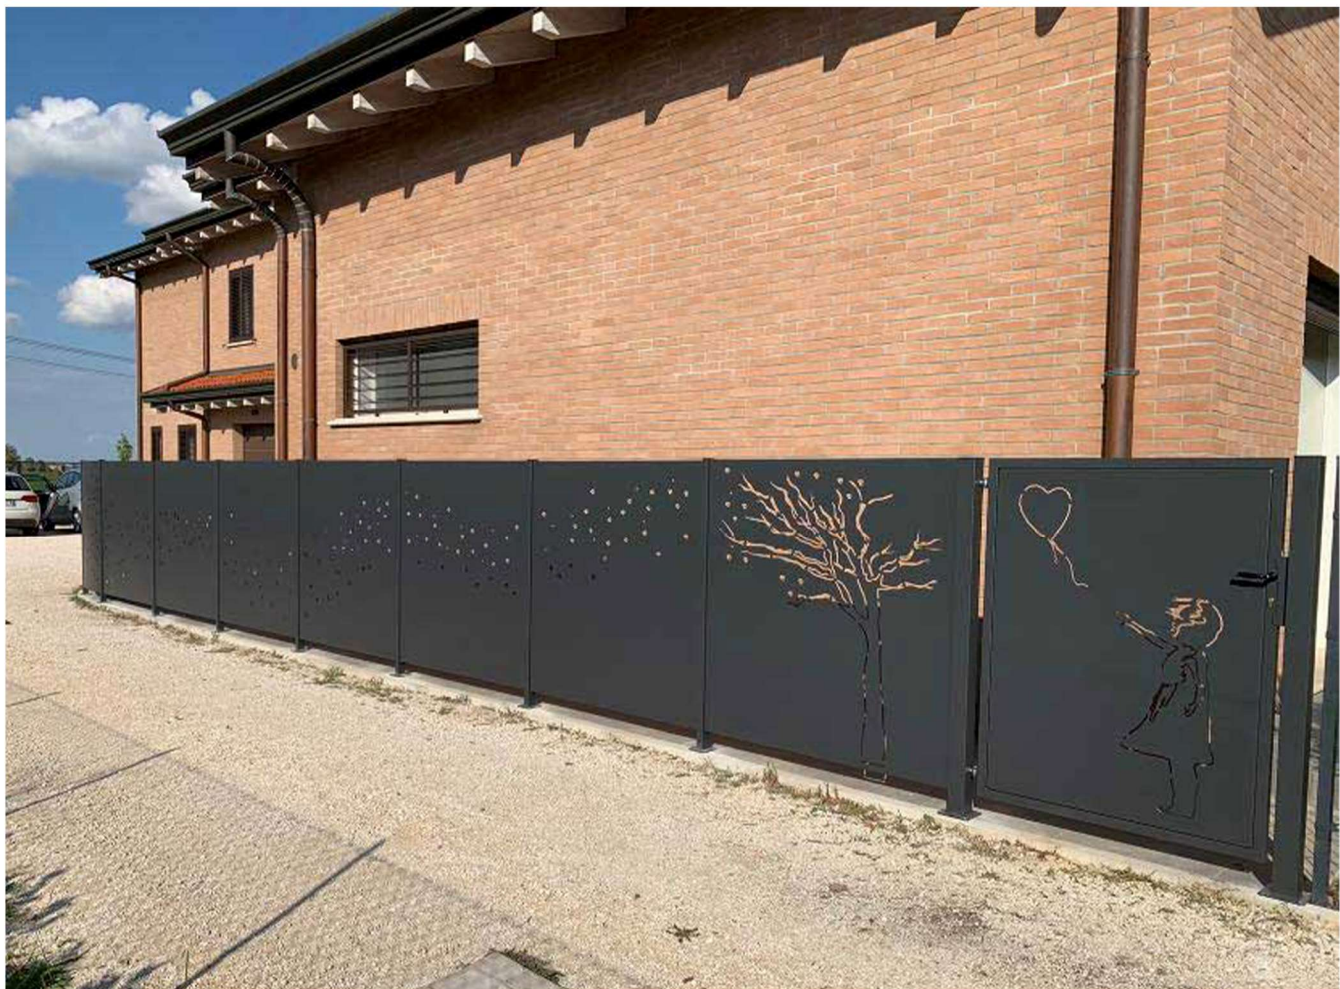

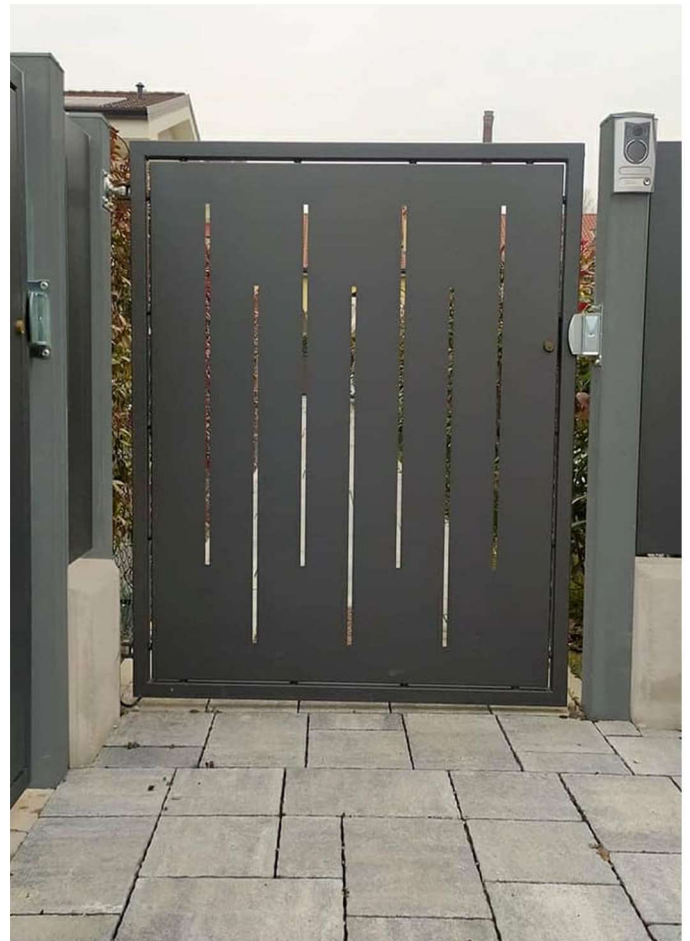

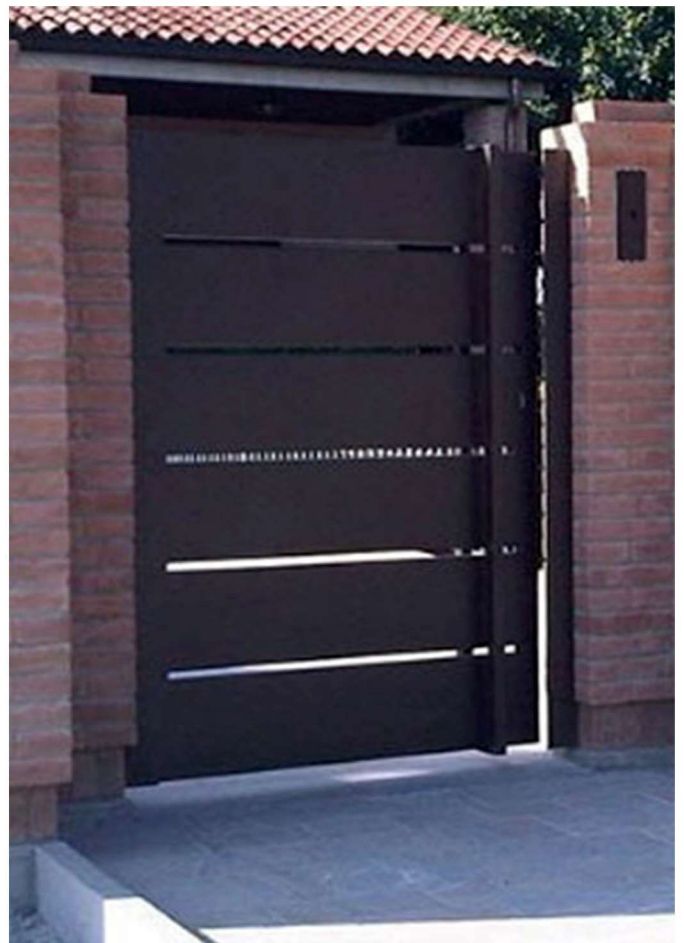

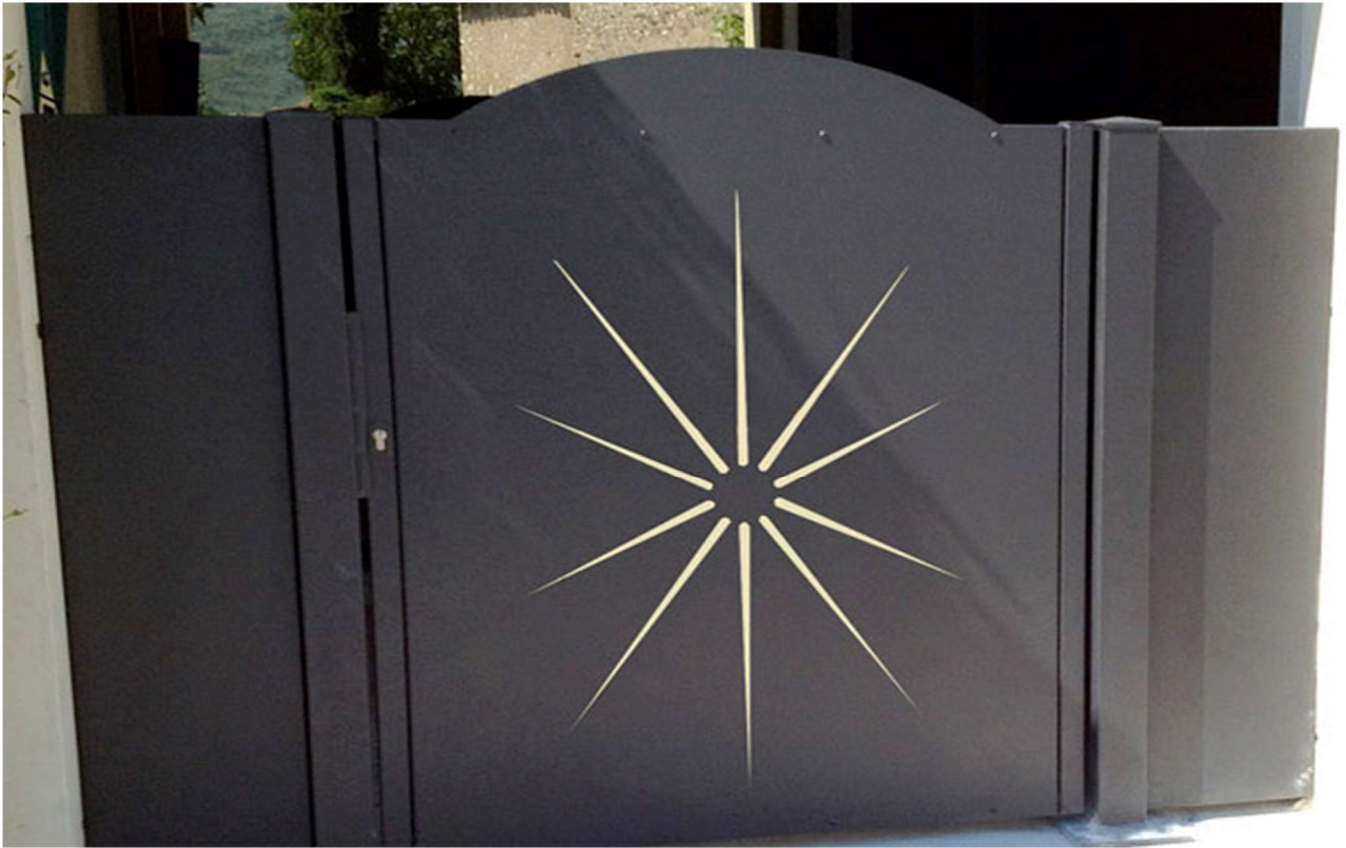

# Hinged Pedestrian Gates

# Driveway Gates
