Ecowater is a distributor of chilled, microfiltered, natural or sparkling drinking water. The zero-mile water limits CO2 emissions and hydrocarbon consumption associated with the transportation and packaging of traditional bottles. The dispenser is equipped with a filter system that eliminates Giardia and Cryptosporidium cysts, asbestos fibers, bad taste and odor, chlorine, dirt, rust, suspended material not visible to the naked eye, mold, and algae. Reduction of oxidized iron, manganese and sulfate. Makes water safe, crystal clear, good for drinking and for all kitchen uses.
